## Professional Profile

---

Fourth-year student of the **Double Degree in Computer Science and Business Administration** at the University of Granada. I possess a versatile hybrid profile, blending **technical proficiency** in software development (Python, C++, Web Technologies) with **strategic business acumen**. Committed to continuous learning and professional growth, I am seeking to contribute my problem-solving skills, adaptability, and proactive mindset to a dynamic professional team. You can view my letters of recommendation by clicking [here](#).

## Education

---

**University of Granada** 2022 — Present (Expected 2027)

*Dual Degree in Computer Science and Business Administration*

Core studies include software development, data structures, databases, operating systems, project management, economics, finance, and business strategy.

**Extra Courses & Certs:** Introduction to Machine Learning • Python • Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate • Javascript • Web Programming (HTML, CSS) • Git & Github • Flutter

## Projects

---

**Personal Portfolio & Academic Hub** | *HTML, CSS, JavaScript, Git* [\[View Project\]](#)

- Developed and deployed a responsive personal website hosted on GitHub Pages to serve as a central repository for academic projects and documentation.
- Implemented clean UI/UX designs and utilized Git for version control and continuous updates.

**Core CS Algorithms & Data Structures** | *C++, Linux, Makefiles* [\[View Github\]](#)

- Implementation of advanced data structures (Trees, Graphs, Hash Tables) and sorting algorithms in C++ focused on memory efficiency and execution speed.
- Experience working in Linux environments, managing processes and system resources.

**AI & Machine Learning coursework** | *Python, Pandas, Scikit-learn*

- Applied machine learning concepts to solve data classification and regression problems.
- Utilized Python libraries for data analysis and model building, aligning with the Oracle AI Foundations certification.

## Skills

---

**Programming Languages:** Python, C++, Java, HTML/CSS, JavaScript, Dart (Flutter), SQL, Ruby.

**Tools & Technologies:** Git/GitHub, Linux (Bash), VS Code, IntelliJ, LaTeX.

**Languages:** English (B2 - Upper Intermediate), Spanish (Native).

**Soft Skills:** Leadership, Eagerness to learn, Discipline, Teamwork, Communication skills, Problem-solving, Adaptability, Time management, Critical thinking.
