About Me

I am a student pursuing a dual degree in Computer Science and Business Administration at the University of Granada.

Personal Statement

I am passionate about expanding my knowledge in various fields, including physics, mathematics, medicine, and more. I am eager to learn and grow in these areas, and I am currently working on my curriculum to better present my skills and experiences.

Education

University of Granada

2022 — Present

Dual Degree in Computer Science and Business Administration

Core studies include software development, data structures, databases, operating systems, project management, economics, finance, and business strategy.

Extra Courses

- Introduction to Machine Learning
- Course of Python
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Course of Javascript
- Course of web programming (HTML, CSS)
- Course of Git and Github
- Course of Flutter

Experience

As a student currently pursuing a dual degree in Computer Science and Business Administration. I am highly motivated to learn and apply my knowledge in real-world scenarios. I am actively seeking opportunities to intern or work on projects that will allow me to develop my skills and gain valuable experience. You can see letter of recommendation clicking [here](#)¹.

Projects

I have a personal website hosted on GitHub Pages where I upload various projects, LaTeX documents, and notes that I create during my studies. This website serves as both a portfolio and a repository of my academic and personal projects. You can visit my website to explore my projects in more detail.
